- EXECUTION; Audits, safety inspections, incident assessments.

## EXPLANATIONS :

### RISK ASSESSMENT & EVALUATION

The Dutch Occupational Health and Safety legislation requires you to conduct a risk assessment and evaluation (RA&E). This means composing a list of all the possible risks on the working floor, as well as all the risk reduction measures you have taken and the risks for employees in special categories. The RA&E can further be specified with task risk assessments, safety studies, etc. An RA&E will, if so required, be evaluated by a certified expert, the so-called higher safety expert (SKO certified).

### DEVELOPING SAFETY PLANS & PROCEDURES

Your safety policies can be made by a systematic approach, or broken by the lack of one. Whether it concerns your plan of action following a

Risk Assessment & Evaluation, a company aid plan or a Safety & Health plan for the construction of a new installation.

### CONDUCTING SAFETY INSPECTIONS

Trust is a good thing, but inspections will always be necessary, also when it comes to your safety policies.

You are even required by law to conduct these inspections. A structured inspection by an independent and professional partner can be a good means of achieving this.

### CONDUCTING INCIDENT ASSESSMENTS

Incidents are: "any and all unwanted events with potential or actual damage to humans, resources or the environment". Incident assessments are there

to prevent recurrence by establishing and implementing management measures. Arts Safety B.V. has experience with all current research methods and can thus provide these services for you in a structured and pragmatic way.

#### **DEVELOPING AND IMPLEMENTING MANAGEMENT SYSTEMS**

A management system makes processes more transparent and easily controllable. Widely used (and recognized) systems within the expertise of Arts Safety B.V. are ISO, SCC, OHSAS and HACCP systems.

#### **UITVOEREN VAN AUDITS**

Audits are a powerful instrument for companies to continuously improve their business, the management system and the operational control.

This concerns audits related to occupational

health and safety (SCC, OHSAS 18001), quality (ISO 9001), environment (ISO 14001) and food safety (ISO 22000). If you would like to have your management system certified, a recognized institution has to conduct an audit. A verification of the protocols of the chosen system will clarify whether you meet the system's requirements.

Arts Safety B.V. has the knowledge and the capacity to conduct these types of (pre-)audits as an interim evaluation or as a preparation for the certification audit. Our advisors can also accompany you during the certification audit.

# RECRUITMENT

DISPATCHING QUALITY, SAFETY AND HEALTH EMPLOYEES THAT FIT YOUR COMPANY; FOR THIS WE FOCUS ON THE CULTURE OF YOUR ORGANIZATION, SO THAT WE CAN FIND THE PERFECT MATCH. WE DISPATCH PROFESSIONALS THAT CONTRIBUTE TO RAISING THE PERMANENT AVAILABILITY OF EMPLOYEES.

IF YOU ARE LOOKING FOR REPLACEMENT, PROJECT SUPPORT, OR TEMPORARY EXTENSION OF YOUR STAFF IN THE FIELD OF QUALITY, HEALTH, SAFETY AND ENVIRONMENT, RECRUITMENT MAY BE A SOLUTION FOR YOU. ARTS SAFETY DEPLOYES THE RIGHT CONSULTANTS FOR OPTIMAL CONTINUATION OF YOUR BUSINESS PROCESSES.

A candidate will be selected based on his experience within the area of expertise and his knowledge of the branch activities. Not only the level of education is taken into account, but also the skills, the experience and the communicative skills.

- Management of Safety, Health & Environment (MoSHE)
- HSE MANAGER / HIGHER DEGREE (HVK)
- SAFETY COORDINATOR / OFFICER (MVK)
- Integraal Veiligheidskundige (IVK)

## MANAGEMENT OF SAFETY, HEALTH & ENVIRONMENT (MOSHE)

With the Management of Safety, Health & Environment (MoSHE) training, professionals are able to play a central role in the daily implementation of safety requirements and the development of future policy.

## HSE MANAGER / HIGHER DEGREE (HVK)

Advisors with a relevant higher professional or scientific education, who can be called upon during policy development, as advisors during design and construction activities, complex occupational health and safety related issues or for specific tasks.

## SAFETY COORDINATOR / OFFICER (MVK)

These advisors can set up, implement and evaluate your occupational health and safety policies. At the same time, they are capable of supervising or executing specific actions. They are employable during your regular operational management, but also during construction or renovation.

## INTEGRAL SAFETY EXPERT (IVK)

Integral safety is the concept for approaching complex, ambiguous safety issues in a broad, integral manner. This means that it is assumed that some security issues are too complex to be tackled by just one party or organization. Therefore, cooperation from multiple disciplines (multidisciplinary) and with multiple parties is necessary to arrive at an adequate approach.

By linking your organizational culture to the background, characteristics, skills and passion of the professional, we create the perfect match.

## YOU CHOOSE ARTS SAFETY B.V. BECAUSE OF:

- The energetic and committed professionals: during the selection procedure, we select and test the skills of our professionals;
- Our experience;
- The right match: both during the selection assessment as well as during the interview, we try to find matches to

various organizational cultures, so that we can offer you a candidate that best fits your organization.

We are able to meet the desires of our relations and our candidates within the shortest of terms. Arts Safety B.V. is an international player, with experience in various countries.

When formulating your order, we assess which skills are important for the execution of the function.

When selecting the candidate, we do not only assess the knowledge and the experience, but also the personal skills.
